

Highly Advanced Water Treatment Products Patented, Proprietary, Intelligent IQ²

= IQ²

Dealer Name and Phone Number

H2O PRO
800-555-8787

Never worry about a competitor placing a larger service sticker on your equipment again. Displays dealer name and number.

Alternative Regeneration Cycles

Choose any alternate regeneration sequence based upon gallons used, days, or number of regenerations. For example, increase salt dosage on a high efficiency unit after five regenerations.

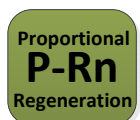

Patented Sanitizing Regeneration Process

Disinfection during every regeneration.

“Inch worm” Iron and Sulfur Technology

Slow backwash air release. New variable timing program.

Proportional Regeneration

Proportionally reduces backwash and rapid rinse effluent.

Proportional Brine

Brine, upflow efficient regeneration.

Alternate Cycle Sequence

Regeneration versatility, any cycle any time.

2-Mav Drive Outputs

Brine reclaim capable/alternate source regeneration.
No Water Mav or 3-way Mav, or any combination of the two.

Express History Recall

Recall all events over the last 90 days, daily and hourly water usages totals, peak flow, brine concentration and injector draw times, and regeneration performance.

Low Salt Alarm Reminder

Patented out of salt alarm. Reduces services calls.

Vacation Mode

Unit pauses regeneration schedules until homeowners return.
